Get this from a library! Geomorphological studies in India. [Kamla Prasad; Nageshwar Prasad, Dr.] -- Case study of Rohtas Plateau, a geomorphic region in the highlands of Bihar.

Geomorphological studies in India (Book, 1997) [WorldCat.org]

The Indian subcontinent is a land of great geomorphic diversity and grand scenery. Two major tectonic influences have affected the Indian subcontinent since the Mesozoic times: fragmentation of the Gondwanaland and the Himalayan Orogenesis. These events, along with Deccan Volcanism, differential uplift and reactivation of faults in the Peninsula, and the onset of monsoon climate over the subcontinent have primarily shaped the megascale architecture and scenery of the Indian landmass.

Geomorphic History and Landscapes of India | SpringerLink

Quaternary geological and geomorphological studies carried out by Roy and Das (1988) along the coasts of the 24-Parganas (South) and Medinipur districts of West Bengal between 1984 and 1988 were followed by monitoring of the coastal process which was initiated in 1990-91 and completed in 1992-93 and explained the dynamic changes of the coasts between the two periods of studies.

CHAPTER 6 COASTAL GEOMORPHOLOGY

ABSTRACT In the present paper, an attempt has been made to study the quantitative geomorphological analysis of a watershed of Ravi river basin in Himachal Pradesh, India. Authors have evaluated the...

Quantitative Geomorphological Analysis of a Watershed of ...

Geomorphology (from Ancient Greek: γῆ, gē, "earth"; μορφή, morphḗ, "form"; and λόγος, lógos, "study") is the scientific study of the origin and evolution of topographic and bathymetric features created by physical, chemical or biological processes operating at or near the Earth's surface. Geomorphologists seek to understand why landscapes look the way they do, to understand ...

Geomorphology - Wikipedia

Geomorphology 2 • The word "geomorphology" comes from the Greek roots "geo," "morph," and "logos," meaning "earth," "form," and "study," respectively. Therefore, geomorphology is literally "the study of earth forms." • Geomorphologists are concerned primarily with earth's surficial features, including their

GEOL 23100: Principles of Geomorphology

Although the study of geomorphology has been around since ancient times, the first official geomorphologic model was proposed between 1884 and 1899 by the American geographer William Morris Davis. His geomorphic cycle model was inspired by theories of uniformitarianism and attempted to theorize the development of various landform features.

A Summary of Geomorphology and Its Processes

studies based on process. It is wrong, however, to confuse the restrictions which are rightly associated with preconceived notions in geomorphology with the advantages of operating within an appropriate general systematic framework. Tho first lead to the closing of vistas and the decrease

Geomorphology and General Systems Theory

ADVERTISEMENT: Here is your paragraph on the geomorphology of the plain: There is a tendency amongst geographers to treat the Great Plain of North India as a monotonous, flat and featureless plain; but it has its own geomorphological varieties which have their own significance. The following geomorphological features may be noticed depending upon the nature [...]

Short Notes on Geomorphology of the Plain of North India

"Geomorphological Mapping: Methods and Applications is a practical textbook that is essential reading to students and professional practitioners wishing to embark on a geomorphological project in any discipline. It is the first book of its kind, in that it brings together many topics that are normally dealt with and taught separately.
