Interpretive research is a research paradigm (see Chapter 3) that is based on the assumption that social reality is not singular or objective, but is rather shaped by human experiences and social contexts (ontology), and is therefore best studied within its socio-historic context by reconciling the subjective

What is Interpretive research design?

We try to locate *cultural contexts and suggest their interpretive relevance via *interpretive projects. We try to determine a disciplined measure of this through a triple-faceted process where each area of consideration interacts with the others until we find a balance among them that seems, above all, to be the best in terms of credibility, but also, hopefully, of interest to others.
