question is about my amp. the alchemy 10" are rated at 300wRMS/600peak (though i've heard its conservative). I was planning on putting a pair of them in a sealed enclosure. My current amp is a Nakamichi PA-4001, monoblock d-class, and its rated 1x400w (20hm), though this rating is, according to what i can tell from nak's website, at 12v. I have an

Nakamichi PA-7 Amplifier Nakamichi is synonymous with high-performance cassette decks, but not everyone is as familiar with the rest of its electronics. The company's first attempts at amplifier and preamplifier design, the 400 and 600 series, were nonetheless popular as they followed the tenets of the day with excellent measured ability albeit somewhat compromised sound.

## Nakamichi PA-7 Amplifier - Old School | TONEAudio MAGAZINE

Very nice and rare Nakamichi PA-400M for sale. The amp is 8/10 condition, with the mounting legs intact and not broken. The anodizing and fins are all very nice with no major scratches or flaws, and the paint on the case is overall very good. The only real flaws are that the terminal blocks have a few broken separator walls on them.
