...

Network Creation. When creating a network, you can set its name, color, security level, and energy type. As security options go, you can use "Public" - no password, or "Encrypted" - password protected. Energy type is the unit your network will operate in. It is recommended to keep this option on the default selection.

This is my little how-to guide on network programming using Internet sockets, or "sockets programming", for those of you who prefer it.

Beej's Guide to Network Programming

One of the easiest and most tech-savvy ways to keep your network secure is by using your smart devices on a separate network. My Netgear R7000 has two networks built right in, as do many of the routers you will buy today. This lowers the risk of hacking across smart devices as well. But you really have two options when it comes to this.
