Learning to build wheels is an important milestone in the education of an apprentice mechanic. A "mechanic" who has not mastered this basic skill cannot be considered to be a fully-qualified, professional, and will always feel inferior to those who can list wheelbuilding among their skills.

# Where To Download Professional Guide To Wheel Building 6th **Wheelbuilding - Sheldon Brown**

The first step to building up a wheel is to figure out the spoke lengths for both sides of each wheel. Due to the prevalence of disc brakes on mountain bikes, most wheels today have four different lengths of spokes. The following websites have formulas to help you calculate your spoke length. You can

Part I. WHEEL-BUILDING 1. This applies to: — ALL TYPES OF WHEELS Examine Rim (where rim tape fits) for position of valve hole relative to the first and second spoke holes, noting the holes on the left, 'C' or 'D'. (In the case of dimpled rims care must be taken to hold the Rim in position so that holes 'C' or 'D' are dimpled).
