## Solving Logarithm Equations Worksheet

Solving Exponential Equations by Graphing Sometimes, it is impossible to rewrite each side of an exponential equation using the same base. You can solve these types of equations by graphing each side and finding the point(s) of intersection.

## Solving Exponential Equations

Exponential inequalities are inequalities in which one or both sides contain a variable exponent. While solving exponential inequalities, we must keep in mind these facts: 1) If  $a > 1$  and  $x < y$ , then  $a^x < a^y$ . If  $a > 1$  and  $a^x < a^y$ , then  $x < y$ . Precisely, the exponential function  $f(x) = a^x$  is monotonically increasing for  $a > 1$ .
